

RIOCOCO 300 COIR GROW BAGS

RIOCOCO 300 Coir Grow Bags can be used to grow a variety of fruit and vegetables.

The Grow Bags will increase your crop production by encouraging your plants to evenly distribute roots, promote faster root growth and develop healthier stems resulting in a higher amount of blooms.

Material Blend

30% Coir Natural Mix/ 70% Coir Chips

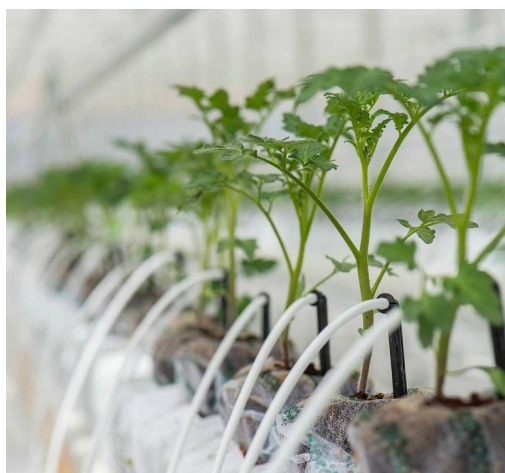

Water Holding Capacity

5.42 L/Kg

Air Filled Porosity

25.06%

4 and 5 hole Grow Bags currently stocked in Australia

RIOCOCO 300 COIR GROW BAGS

Benefits:

- Coco Peat is 100% naturally organic
- Super Washed: less than 1 EC - Carefully washed and dried multiple times to remove excess sodium before blending, resulting in an extremely safe and consistent high-quality product
- Biodegrades slowly due to its high lignin content and large particle size so you can reuse it for several crop cycles
- Lightweight, uniform and consistent
- Air / water ratio, porosity and drainage capacity
- Co-extruded bags UV stabilized (for two years)
- Renewable and eco friendly

Specifications:

- 5.6 - 6.8 pH range
- 100 x 15 x 12 cm high when wet
- Pre-cut 10cm² plant holes
- 250 slabs / pallet

Quality Standard Certification

- ISO 9001:2015 - 14001:2015 certified company
- OMRI (Organic Material Review Institute)
- GMP (Good Manufacturing Process) SLSI

Other Grow Bag configurations or Material Blends are available upon request.
